#### **OUTPOON** POWER RATING

| Engine Speed | Type of       | Engine | Power |
|--------------|---------------|--------|-------|
| rpm          | Operation     | kW     | Ps    |
| 1500         | Prime Power   | 185    | 251   |
|              | Standby Power | 204    | 280   |

- -. The engine performance is as per GB/T2820.
- -. Ratings are based on GB/T1147.1.
- ---Prime power is available for an unlimited number of hours per year in a variable load application. The permissible average power output over 24 hours of operation shall not exceed 80% of the prime power rating.
- ---Standby power is available in the event of a utility power outage or under test conditions for up to 200 hours of operation per year. The permissible average power output over 24 hours of operation shall not exceed 80% of the standby power rating.
